

PRESS RELEASE

Mumbai, 16th February, 2026

Vayona Energy and Oyster Renewable Collaborate to Deliver 64.8 MW Wind Power in Andhra Pradesh.

Vayona Energy announces its first India market deal with Oyster Renewable Energy Private Limited, an Independent Power Producer (IPP). As a leading wind turbine OEM in India and South Asia, Vayona Energy is dedicated to accelerating the transition to green energy and delivering sustainable power solutions across the region.

Under this agreement, Vayona Energy will supply 18 SG 3.6-145 wind turbines, totaling 64.8 MW, for a project in Kadapa, Andhra Pradesh, along with a long-term operations and maintenance contract. Building on our recent entry into the Indian market, after the acquisition from Siemens Gamesa, Vayona enters the market with a clear strategy to scale onshore wind solutions across India and Sri Lanka.

“We’ve made a strong start with a robust customer order book exceeding 1 GW and an O&M portfolio of ~7 GW. This order from Oyster Energy further reinforces the confidence our customers place in our products and capabilities. Our commitment to the Indian market is unwavering - we are building on this strong foundation with optimised offerings designed to boost performance and competitiveness. We are gearing up to meet diverse customer needs with agility and innovation to serve India’s growing renewable energy landscape. We thank Oyster Energy for their trust as they continue to build their renewable energy portfolio in India” **said Prashant Jain, Executive Vice Chairman of Vayona Energy.**

Commenting on this, **Siddharth Bhatia, Managing Director, Oyster Renewable Energy Pvt. Ltd.,** said *“This 64.8 MW project is a major milestone—representing our first and largest venture into Andhra Pradesh. Vayona Energy was the clear choice for their technical excellence and robust manufacturing base, specifically their advanced 3.6 MW machines which are perfectly suited for the region’s wind conditions. This partnership reinforces our commitment to the ‘Make in India’ approach, allowing us to strengthen the domestic energy ecosystem while delivering high-performance, sustainable power to our commercial and industrial clients.”*

Since the launch of the 3X platform in India, order intake has surpassed 3.6 GW, with installations exceeding 2 GW as of December 2025. This reflects strong market confidence in the company's technology, execution capabilities, and the proven reliability of its turbines under Indian operating conditions. The major components for these wind turbines will be manufactured and assembled at Vayona Energy's facilities in Mamandur, near Chennai, with supply scheduled to commence in the first quarter of CY 2026.

About Oyster Renewable:

Oyster Renewable Energy Pvt Ltd is committed to spearheading the renewable energy revolution as an Independent Power Producer (IPP), founded with a vision to transform the way power is generated and consumed. At the heart of Oyster Renewable's mission is the development, investment, and operation of cutting-edge Renewable Energy (RE) projects. These projects are strategically tailored to cater to the ever-growing needs of Commercial and Industrial (C&I) consumers across India. With a keen eye on environmental sustainability, Oyster Renewable's projects are designed as hybrid systems, optimising the synergy between Solar and Wind capacities. This strategic blend not only ensures a consistent power supply but also reduces the carbon footprint.

About Vayona Energy:

Vayona Energy Private Limited, is a leading wind turbine original equipment manufacturer (OEM) in India and South Asia. With a strong workforce of ~ 1,000 professionals, two state-of-the-art manufacturing plants and a portfolio in excess of ~12GW in operational and development assets, Vayona Energy is well-positioned to deliver reliable, affordable, and clean energy across the region. Focused on wind power and sustainable solutions, the Company is committed to driving the region's transition to clean energy while delivering long-term value to stakeholders.
